Steps to Disable OTP for Salesforce application

Once completed the above steps

1. Log in to your Salesforce account.
2. From the left-hand side menu, expand the "Users" option which is under the "Administration" section, and then click on "Users."
3. Click on your profile (System Administrator) from the profile column on the right-hand side.
4. Scroll down to the bottom of the page and locate the section labelled as "Login IP Ranges."
5. Click the "New" button within the Login IP Ranges section.
6. In the "Start IP Address" field, enter "0.0.0.0," and in the "End IP Address" field, enter "255.255.255.255."
7. Finally, click the "Save" button to apply the changes.
